ACHA Webinars Presents:

*Neurocognitive Issues in Adults with Congenital Heart Disease*

Wednesday, March 23, 2016, 7 p.m. – 8 p.m. EDT

**Presenter:**
Stephen R. Crumb, DNP, AACC

**About the Webinar**
With advances in surgical care, more children with congenital heart disease (CHD) are surviving into adulthood. With this, we are learning that the side effects of some procedures can affect the nervous system and mental processing. Are you interested in learning what these are and what this means for adults living with CHD? If so, you don’t want to miss this webinar. Register today and you will find out what research is telling us.

**REGISTER NOW:**

**About the Presenter**
Dr. Crumb is a nurse practitioner in the Columbus Ohio Adult Congenital Heart (COACH) Program. He has been involved with ACHD patients for nearly 20 years and with ACHA for almost as long. He has done research in ACHD patient outcomes. He has a passion for patient and family education. He hopes to develop a training program for nurse practitioners in congenital heart disease. Dr. Crumb serves ACHA on the Research Committee and the Medical Advisory Board.

**About the Adult Congenital Heart Association**
The mission of the Adult Congenital Heart Association (ACHA) is to improve and extend the lives of the millions born with heart defects through education, advocacy and the promotion of research. If you would like to find out more about our programming, visit our website, www.achaheart.org. To support ACHA’s mission to improve and prolong the lives of heart defect survivors, you can make a donation on our website.

*This webinar was made possible in part by unrestricted educational grants from Actelion Pharmaceuticals US, Inc. and Gilead Sciences.*
