AGENDA

• Introductions
• Budget Update from NCBDDD
  – Remarks from Acting Director Amanda Cohn, MD, FAAP
• Q&A with Center Staff
• Friends Business Meeting
National Center on Birth Defects and Developmental Disabilities

Budget Update

February 13, 2020

Sascha Chaney
Associate Director for Policy
National Center on Birth Defects and Developmental Disabilities
Centers for Disease Control and Prevention
Amanda Cohn, MD, FAAP

- Acting Director of NCBDD
- CAPT, USPHS
NCBDDD Budget Status

- FY18 Request: $140M
- FY18 Enacted: $100M
- FY19 Request: $155M
- FY19 Enacted: $110M
- FY20 Request: $160M
- FY20 Enacted: $112M
- FY21 Request: $112M
FY21 Request

- President’s Budget Request - $112M
  - $100M for NCBDDDD priority public health activities
  - $10M for Surveillance for Emerging Threats to Mothers and Babies
  - $2.25M for NAS Surveillance
Making a Difference Across the Lifespan

NCBDDD Priorities

- Protecting Babies Through Surveillance
  - Continue to maintain and adapt our multi-pronged surveillance approach to rapidly respond to and protect mothers and babies from emerging or urgent health threats

- Act Early: Children’s Mental Health
  - Ensure all children at risk for a Mental, Behavioral, Developmental Disorders are identified early and receive timely treatment and intervention

- Sickle Cell Data Collection: Getting Treatment to Patients
  - Collect essential data on SCD diagnosis, treatment, and health care to guide policy and health care standards and helps people with SCD access adequate health care
Protecting Babies Through Surveillance

Emerging Threats to Mothers and Babies is prepared to:

- Respond to protect mothers and babies in a new public health emergency
- Build capacity in new jurisdictions
- Establish centers of excellence to quickly translate discoveries

In States and Communities

Health departments are addressing threats such as Zika, Hepatitis C, and Congenital Syphilis
Act Early: Children’s Mental Health

CDC is prepared to:

- Establish a national surveillance system on MBDDs for children aged 0 to 18 years.
- Integrate monitoring, screening, and identification of MBDDs for children aged 6 to 18 years into schools and healthcare settings.
The SCDC Program is prepared to:

- Expand to additional states
- Create systems to gather key data
- Adapt as new and future treatments become available
In one hour, 450 babies will be born in the United States. Of these babies:

- 15 will have a major birth defect including 1 with congenital deafness.
- 4 will be diagnosed with neonatal abstinence syndrome.
- 8 will be diagnosed with autism by kindergarten.
- 6 of their peers will be identified in early childhood with one of the many complex genetic conditions (sickle cell disease, muscular dystrophy, and hemophilia).
- 54 will be identified with attention-deficit/hyperactivity disorder (ADHD) as they move through grade school.

NCBDDD works in the following areas:

- **SAVING BABIES**
  - Through Surveillance, Research, and Prevention of Birth Defects and Infant Disorders
- **HELPING CHILDREN**
  - Live to the fullest by understanding developmental disabilities
- **PROTECTING PEOPLE**
  - and Preventing Complications of Blood Disorders
- **IMPROVING HEALTH**
  - of People with Disabilities
